INVESTORS FROM MORE THAN 50 COUNTRIES EXPECTED TO ATTEND

The Company extends an invitation to all of its shareholders and prospective shareholders to view our presentation and attend this event. The online nature of the conference will allow investors, both retail and institutional, to connect with small and mid-cap resource companies faster, better and cheaper thanks to the elimination of all travel, lodging and time away from work.

Presenting companies, investors and keynote speakers will all participate from the comfort of their offices and homes, resulting in a conference comprised of a global audience vs. a local audience. AGORACOM anticipates investors from more than 50 countries will participate, making this a truly international and environmentally friendly conference that will generate a fraction of the carbon footprint of traditional conferences.

ABOUT FIRST BAUXITE CORPORATION

First Bauxite Corporation (FBX: TSX-V) is a Canadian natural resources company engaged in the exploration and development of bauxite deposits, through resource discovery and mining within a niche industrial market. The company has its head-office in Vancouver and its current assets in Guyana, South America and is managed by experienced geoscientists and business development professionals with worldwide experience in the exploration and mining business across a number of mineral commodities. The mission of First Bauxite is to become a near term, medium size producer and supplier of high quality refractory grade calcined bauxite. First Bauxite controls a large land package in Guyana's historical coastal bauxite belt, including the Bonasika Mining License and the Waratilla Prospecting License, covering deposits which were drilled in 1940's-60's by ALCAN and which host near surface deposits of refractory grade bauxite. First Bauxite has additional upside potential to the metallurgical bauxite business, through an option agreement with Rio Tinto Alcan, whereby Rio can earn up to 75% interest in the Company's exploration ground by expending up to US\$58 million in stages.
