

First Bauxite Corporation Appoints New Chief Financial Officer

April 2, 2013

TSXV: FBX

Toronto, ON - First Bauxite Corporation (“First Bauxite” or the “Company”) announces that Carlos Pinglo has been appointed Chief Financial Officer and Corporate Secretary of First Bauxite succeeding Ian Fodie. The Company thanks Mr. Fodie for his contributions and wishes him well in his future endeavors.

Mr. Pinglo will also continue in his role as Chief Financial Officer and Corporate Secretary of Eurotin Inc. He is an economist with over 20 years senior management experience working with both private and public companies in corporate finance, strategic planning, financial reporting and mergers and acquisitions. He has previously held a number of senior finance roles, including Chief Financial Officer at Medoro Resources Ltd., Vice President, Finance at Pacific Coal Resources Ltd., Controller of both Silver Eagle Mines Inc. and Excellon Resources Inc. and a member of the Board of Directors of Mineros Nacionales S.A.

About First Bauxite: First Bauxite is a Canadian natural resource company engaged in the exploration and development of bauxite deposits in Guyana, South America. The Company has its head office in Toronto and is managed by experienced geoscientists and business development professionals with worldwide experience in the exploration and mining business across a number of mineral commodities. The mission of First Bauxite is to become a near term, medium size producer and supplier of high quality refractory grade sintered (calcined) bauxite. First Bauxite controls a large land package in Guyana’s historical coastal bauxite belt, including the Bonasika Mining License, the Waratilla-Cartwright Prospecting License, and the Essequibo PGGS Prospecting Permit. The Company also holds the Tarakuli and contiguous Tarakuli North-West Prospecting Licenses in Northeast Guyana. The Company’s Bankable Feasibility Study Update defines and confirms the economic viability of an operation based on sequential mining of the two (2) bauxite deposits (Bonasika 6 and Bonasika 7), and the construction of a washing plant facility, a sintering plant, and load out facilities, at Sand Hills. The Bonasika 1, 2 and 5 deposits are additional value and would increase the mine of life from 36 years to 44.5 years.
